

Contents

<i>Preface: an Editors' guide to reading the book</i>		xiii
<i>Contributors</i>		xix
Part I	The disease and its diagnosis	1
Chapter 1	Defining the disease: an introduction	3
	O. Fejerskov, E.A.M. Kidd, B. Nyvad and V. Baelum	
	<i>Introduction</i>	4
	<i>Terminology</i>	5
	<i>Background literature</i>	6
	<i>References</i>	6
Chapter 2	Clinical appearances of caries lesions	7
	O. Fejerskov, B. Nyvad and E.A.M. Kidd	
	<i>What do caries lesions look like clinically?</i>	8
	<i>Deciduous dentition</i>	8
	<i>Permanent dentition</i>	10
	<i>References</i>	18
Chapter 3	Pathology of dental caries	19
	O. Fejerskov, B. Nyvad and E.A.M. Kidd	
	<i>Introduction</i>	20
	<i>Enamel reactions during eruption</i>	21
	<i>Enamel changes during early caries lesion development</i>	23
	<i>The approximal white-spot lesion</i>	27
	<i>Progression of the enamel lesion</i>	32
	<i>Arrest of the caries lesion</i>	32
	<i>Occlusal caries</i>	35
	<i>Dentin reactions to caries progression</i>	39
	<i>Pulpo-dentinal reactions</i>	42
	<i>Root-surface caries</i>	44
	<i>Background literature</i>	47
	<i>References</i>	48
Chapter 4	Visual-tactile caries diagnosis	49
	B. Nyvad, O. Fejerskov and V. Baelum	
	<i>Introduction</i>	50
	<i>The diagnostic process</i>	50
	<i>Why do we diagnose caries?</i>	51
	<i>Diagnosis in a dental caries perspective</i>	51
	<i>How early should caries lesions be detected?</i>	53
	<i>What are the best visual-tactile caries diagnostic criteria?</i>	53
	<i>Commonly used visual-tactile criteria</i>	55
	<i>Differential diagnosis</i>	60
	<i>Visual-tactile caries examination: a systematic clinical approach</i>	62
	<i>Additional aids in visual-tactile caries diagnosis</i>	64
	<i>Benefits and limitations of visual-tactile caries diagnosis</i>	66
	<i>References</i>	67

Chapter 5	Radiography for caries diagnosis	69
	I. Mejäre and E.A.M. Kidd	
	<i>Introduction</i>	70
	<i>Technical and quality aspects</i>	70
	<i>Prescription and timing of bitewing radiography</i>	79
	<i>References</i>	87
Chapter 6	Additional diagnostic measures	89
	A. Lussi and B. Angmar-Månsson	
	<i>Introduction</i>	90
	<i>Methods based on X-ray</i>	90
	<i>Methods based on light</i>	92
	<i>Methods based on electrical current</i>	97
	<i>Are the methods suitable for use in clinical practice or only useful for research?</i>	98
	<i>Can the methods stand alone or are they only adjuncts to a clinical–visual examination?</i>	99
	<i>References</i>	99
Chapter 7	The foundations of good diagnostic practice	103
	V. Baelum, B. Nyvad, H.-G. Gröndahl and O. Fejerskov	
	<i>Introduction</i>	104
	<i>The making of a dentist</i>	104
	<i>The dental examination: in the best interest of patients</i>	105
	<i>What are we looking for – what is caries?</i>	106
	<i>The wealth of caries diagnostic methods</i>	108
	<i>The evolution in caries diagnostic methods</i>	108
	<i>Evaluating caries diagnostic methods</i>	109
	<i>Diagnostic test assessment in the essentialistic gold-standard paradigm</i>	109
	<i>Leaps in the essentialistic gold-standard reasoning</i>	111
	<i>Diagnostic test evaluation in the nominalistic caries paradigm</i>	113
	<i>Interexaminer and intraexaminer errors in caries diagnosis</i>	114
	<i>How do we deal with the unavoidable diagnostic uncertainty?</i>	115
	<i>The additional diagnostic yield argument</i>	116
	<i>Concluding remarks</i>	117
	<i>References</i>	118
Part II	Clinical caries epidemiology	121
Chapter 8	The epidemiology of dental caries	123
	B.A. Burt, V. Baelum and O. Fejerskov	
	<i>Introduction</i>	124
	<i>Measuring dental caries</i>	125
	<i>Distribution of caries</i>	129
	<i>Summary</i>	141
	<i>References</i>	141
Chapter 9	The impact of diagnostic criteria on estimates of prevalence, extent and severity of dental caries	147
	N. Pitts	
	<i>Introduction</i>	148
	<i>Diagnostic criteria for dental caries: an epidemiological perspective</i>	148
	<i>Caries diagnostic thresholds and specific epidemiological considerations</i>	151
	<i>Impact of diagnostic criteria on estimates of caries prevalence</i>	154
	<i>Impact of diagnostic criteria on estimates of caries extent</i>	155

	<i>Impact of diagnostic criteria on estimates of the severity of dental caries</i>	157
	<i>A framework for considering the choice of appropriate diagnostic criteria for epidemiological studies</i>	158
	<i>Summary</i>	158
	<i>References</i>	158
Part III	Dental caries in a biological context	161
Chapter 10	The oral microflora and biofilms on teeth	163
	P.D. Marsh and B. Nyvad	
	<i>Introduction</i>	164
	<i>The resident microflora</i>	164
	<i>Dental biofilms: development, structure, composition and properties</i>	166
	<i>Caries microbiology: a brief historical perspective</i>	178
	<i>Methodological problems in microbiological studies of dental caries</i>	178
	<i>Microbiology of caries</i>	179
	<i>Cariogenic features of dental biofilm bacteria</i>	182
	<i>Concluding remarks</i>	185
	<i>Background literature</i>	185
	<i>References</i>	185
Chapter 11	The role of saliva	189
	A. Bardow, F. Lagerlöf, B. Nauntofte and J. Tenovou	
	<i>Introduction</i>	190
	<i>Formation of saliva</i>	190
	<i>Hypofunction of salivary glands</i>	194
	<i>Oral clearance</i>	195
	<i>Inorganic saliva composition</i>	196
	<i>Saliva buffer capacity and pH regulation</i>	198
	<i>Saliva proteins</i>	200
	<i>Role of the pellicle</i>	202
	<i>Other caries-related components in saliva</i>	203
	<i>Saliva and the risk of developing caries lesions</i>	204
	<i>Management of salivary gland hypofunction</i>	206
	<i>Concluding remarks</i>	206
	<i>Background literature</i>	207
	<i>References</i>	207
Chapter 12	Chemical interactions between the tooth and oral fluids	209
	J.M. ten Cate, M.J. Larsen, E.I.F. Pearce and O. Fejerskov	
	<i>Introduction</i>	210
	<i>The importance of the mineral phase in enamel</i>	210
	<i>Enamel mineral and oral fluids</i>	213
	<i>Deminerlization and remineralization of the dental hard tissues</i>	217
	<i>Remineralization</i>	220
	<i>Dentin caries</i>	221
	<i>Fluoride reactions in the oral environment</i>	225
	<i>Dental calculus</i>	229
	<i>Background literature</i>	230
	<i>References</i>	230

Chapter 13	Erosion of the teeth	233
	M.J. Larsen	
	<i>Introduction</i>	234
	<i>Clinical manifestations and diagnosis</i>	234
	<i>Histological and chemical features</i>	236
	<i>Classification by depth of the lesion</i>	237
	<i>Classification by etiology</i>	237
	<i>Erosion caused by food and drinks</i>	238
	<i>Erosion caused by stomach contents</i>	243
	<i>Erosion caused by airborne acids</i>	243
	<i>Idiopathic erosion</i>	244
	<i>Prophylaxis and treatment of erosion</i>	244
	<i>Conclusion</i>	246
	<i>Background literature</i>	246
	<i>References</i>	246
Part IV	Non-operative therapy	249
Chapter 14	The control of disease progression: non-operative treatment	251
	E.A.M. Kidd and O. Fejerskov	
	<i>Introduction</i>	252
	<i>Can the caries process be prevented?</i>	252
	<i>Controlling disease progression</i>	252
	<i>Should disease control be considered as 'treatment' of the caries lesion?</i>	253
	<i>Why use the term 'non-operative treatment'?</i>	254
	<i>Does the approach work? Is it cost-effective?</i>	254
	<i>References</i>	254
Chapter 15	Role of oral hygiene	257
	B. Nyvad	
	<i>Introduction</i>	258
	<i>Some theoretical considerations</i>	258
	<i>The biological effect of tooth cleaning</i>	258
	<i>The clinical effect of tooth cleaning</i>	259
	<i>The effect of professional tooth cleaning</i>	262
	<i>The effect of dental flossing</i>	263
	<i>Concluding remarks</i>	263
	<i>References</i>	263
Chapter 16	Antimicrobials in caries control	265
	A.A. Scheie and F.C. Petersen	
	<i>Dental plaque: the biofilm lifestyle and the rationale for antimicrobial intervention</i>	266
	<i>Biological activity and mode of action</i>	267
	<i>Modification of dental biofilm biochemistry and ecology</i>	269
	<i>Vehicles for administration of caries-prophylactic agents</i>	269
	<i>Specific agents</i>	270
	<i>Other agents proposed for caries prophylaxis, but without documented anticaries effect</i>	273
	<i>Concluding remarks and future approaches</i>	275
	<i>Background literature</i>	276
	<i>References</i>	276

Chapter 17	Might caries control involve immunization and gene therapy?	279
	R.R.B. Russell	
	<i>Introduction</i>	280
	<i>Dental caries vaccine</i>	280
	<i>Alternative approaches to targeting cariogenic bacteria</i>	284
	<i>Natural defense mechanisms of the tooth</i>	284
	<i>Conclusion</i>	285
	<i>References</i>	285
Chapter 18	Fluorides in caries control	287
	R. Ellwood, O. Fejerskov, J.A. Cury and B. Clarkson	
	<i>Introduction</i>	288
	<i>How fluoride came into dentistry</i>	288
	<i>Physiological and toxicological aspects of fluoride delivery</i>	293
	<i>Current methods of fluoride delivery</i>	304
	<i>Appropriate use of fluoride in caries control</i>	319
	<i>Summary of recommendations for fluoride-delivery methods</i>	322
	<i>Background literature</i>	323
	<i>References</i>	323
Chapter 19	The role of dietary control	329
	D.T. Zero, P. Moynihan, P. Lingström and D. Birkhed	
	<i>Introduction</i>	330
	<i>Diet and dental caries in humans</i>	330
	<i>Influence of different intake patterns</i>	333
	<i>Influence of fluoride on the relationship between sugars and caries</i>	334
	<i>Groups at increased risk of dental caries in relation to diet</i>	336
	<i>Relative cariogenicity of different carbohydrates</i>	338
	<i>Novel carbohydrates and dental health</i>	338
	<i>Protective factors in foods</i>	344
	<i>Diet and dental erosion</i>	346
	<i>Promoting good dietary habits for dental health</i>	346
	<i>References</i>	349
Part V	Operative intervention	353
Chapter 20	The role of operative treatment in caries control	355
	E.A.M. Kidd, J.P. van Amerongen and W.E. van Amerongen	
	<i>Introduction</i>	356
	<i>What is happening in your dental school?</i>	356
	<i>The outcome of non-operative treatment</i>	356
	<i>Does this approach always work?</i>	358
	<i>Occlusal surfaces</i>	358
	<i>Approximal surfaces</i>	359
	<i>Recurrent caries</i>	359
	<i>Deciduous teeth</i>	361
	<i>Summary</i>	363
	<i>References</i>	364

Chapter 21	Caries removal and the pulpo-dentinal complex	367
	E.A.M. Kidd, L. Bjørndal, D. Beighton and O. Fejerskov	
	<i>Introduction</i>	368
	<i>Summary of caries lesion progression in dentin</i>	368
	<i>The pulpo-dentinal complex and caries</i>	371
	<i>The relevance of pulpo-dentinal reactions to operative management</i>	373
	<i>The current operative tradition</i>	374
	<i>The infected dentin concept and its clinical consequence</i>	374
	<i>Studies placing fissure sealants over carious dentin</i>	376
	<i>Stepwise excavation studies</i>	376
	<i>Why re-enter?</i>	377
	<i>Randomized controlled clinical trials</i>	380
	<i>Conclusions</i>	382
	<i>References</i>	382
Chapter 22	Restoring the tooth: 'the seal is the deal'	385
	J.P. van Amerongen, W.E. van Amerongen, T.F. Watson, N.J.M. Opdam, F.J.M. Roeters, D. Bittermann and E.A.M. Kidd	
	<i>Introduction</i>	386
	<i>Materials</i>	387
	<i>Treatment of pit and fissure caries</i>	396
	<i>Treatment of approximal caries</i>	402
	<i>Treatment of caries in anterior teeth and the cervical area</i>	410
	<i>Restorative procedures in the primary dentition</i>	416
	<i>Failure and repair of restorations</i>	420
	<i>References</i>	423
Chapter 23	The atraumatic restorative treatment approach	427
	J.E. Frencken and W.E. van Amerongen	
	<i>History of ART</i>	428
	<i>A treatment approach of fissure sealing and minimal operative intervention</i>	429
	<i>Atraumatic aspects</i>	431
	<i>The ART approach step-by-step, for use with glass-ionomer restorative material</i>	432
	<i>Survival of ART sealants and ART restorations</i>	434
	<i>Comparison of ART with conventional treatment approaches</i>	438
	<i>Causes of failure of ART restorations</i>	439
	<i>Integration of ART into oral health services</i>	439
	<i>References</i>	440
Chapter 24	Longevity of restorations: the 'death spiral'	443
	V. Qvist	
	<i>Introduction</i>	444
	<i>Clinical assessment of restorations</i>	444
	<i>Assessment of restoration longevity</i>	444
	<i>The amalgam debate and its consequences for restoration longevity</i>	447
	<i>Longevity of restorations in the primary dentition</i>	448
	<i>Longevity of restorations in the permanent dentition</i>	449
	<i>Factors influencing restoration longevity</i>	451
	<i>Consequences of restoration longevity for dental health and cost</i>	453
	<i>Concluding remarks</i>	454
	<i>References</i>	454

Part VI	Caries control and prediction	457
Chapter 25	Clinical decision making: technical solutions to biological problems or evidence-based caries management?	459
	V. Baelum	
	<i>Introduction</i>	460
	<i>The historical bias towards dental mechanics</i>	460
	<i>Appropriate dental care: what is it?</i>	461
	<i>Appropriate caries management: how to get there?</i>	462
	<i>Are we heading towards 'cookbook' dentistry?</i>	464
	<i>Caries-related clinical decision making: what is not</i>	464
	<i>Caries-related clinical decision making: what is</i>	467
	<i>Appropriate caries scripts: proposal for a guideline</i>	468
	<i>References</i>	471
Chapter 26	Promoting oral health in populations	475
	E. Kay and R. Craven	
	<i>Defining oral health and health education and promotion</i>	476
	<i>Theories of health-related behavior</i>	477
	<i>Oral health education: does it work?</i>	479
	<i>Practical tips for influencing individual patients' behavior</i>	482
	<i>Conclusions</i>	485
	<i>References</i>	485
Chapter 27	Caries control for the individual patient	487
	E.A.M. Kidd, B. Nyvad and I. Espelid	
	<i>Introduction</i>	488
	<i>How are current caries activity and risk of future caries progression assessed?</i>	488
	<i>How is the information used to categorize patients into risk groups?</i>	491
	<i>What non-operative treatments are available?</i>	491
	<i>How is the individual helped to control disease progression?</i>	495
	<i>When should the patient be recalled?</i>	496
	<i>Caries control in children and adolescents</i>	497
	<i>Caries control in patients with a dry mouth</i>	500
	<i>Caries control in people who cannot care for themselves</i>	502
	<i>Failure</i>	503
	<i>References</i>	503
Chapter 28	Caries control for populations	505
	V. Baelum, A. Sheiham and B. Burt	
	<i>Introduction</i>	506
	<i>The caries decline and changes in the practice of dentistry</i>	506
	<i>Why does caries occur?</i>	507
	<i>Upstream or downstream: does it matter?</i>	510
	<i>Sick individuals or sick populations?</i>	511
	<i>Options for change: which preventive strategy should be used?</i>	512
	<i>The high-risk approach</i>	513
	<i>The population strategy for caries prevention</i>	515
	<i>The directed population strategy</i>	517
	<i>A short history of caries-preventive strategies for populations</i>	518
	<i>A wider perspective on prevention</i>	519
	<i>Wanted: a population-based common risk factor approach to prevention</i>	520
	<i>Where does this leave the traditional dentist? Need for a new professionalism</i>	521
	<i>References</i>	523
